## SUMMARY

**Aspiring Java Backend Developer** with strong problem-solving skills and a solid foundation in **Core Java, SQL and Hibernate**. Eager to contribute to backend development projects by writing clean, efficient, and maintainable code. Passionate about building scalable applications and continuously learning emerging technologies and frameworks. Known for a collaborative mindset and the ability to adapt quickly in dynamic development environments.

## EDUCATION

**B.Tech in Computer Science and Engineering**, SVPCET, Puttur **2021-2025**

CGPA: 9.3

**Intermediate (MPC)**, A.P Model Jr. college, Baireddypalli **2019-2021**

Percentage: 92%

## SKILLS

|                              |                                                                              |
|------------------------------|------------------------------------------------------------------------------|
| <b>Programming Languages</b> | Java                                                                         |
| <b>Web Technologies</b>      | HTML5, CSS3                                                                  |
| <b>Database</b>              | MySQL                                                                        |
| <b>Version Control</b>       | Git, GitHub                                                                  |
| <b>Soft Skills</b>           | Problem Solving, Communication, Time Management, Creative, Critical thinking |

## WORK EXPERIENCE

### Python Intern

**MSR EDUSOFT PRIVATE LIMITED**

**Aug2023-Oct2023**

- The course is focused on Python Programming.
- It is designed as a practical internship-based training.
- The program aims to enhance programming skills relevant to industry needs.

## PROJECTS

### Emotion Classification Using Deep Learning

- Built a facial emotion classification system using Python, Tensor Flow, Keras, NumPy, OpenCV, and VS Code v1.98
- Implemented CNN to detect emotions like happy, sad, angry, surprised, and neutral from facial expressions.
- Implemented a web interface for users to upload audio or use live video to receive real-time emotion classification results.
- The system supports applications in mental health monitoring, customer service, social robotics, and emotion-aware computing.

## CERTIFICATIONS

- NPTEL Certification in Introduction to Machine Learning (12weeks).
- NPTEL Certification in Machine Learning for Engineering and Science Applications (12Weeks).
- Hacker Rank Certification in Java(Basic).
- Attended a workshop on “Data Analysis” conducted by Department of Computer Science & Engineering With the collaboration of “Kreative Bee Technologies”.
